

Clinical Express

Express and exclusive

Clinical Express combines the cost-effectiveness of a worldwide network provider with the personal touch of a specialised courier.

What's more, we deliver a unique range of flexible services to meet your logistics needs. Partnering with you from protocol design to study completion.

Every clinical trial is unique, with different investigators in a variety of countries, sample types, laboratory locations and patients.

That's why Clinical Express provides a full range of services to respond to all your logistics needs. Ranging from standard Express to specialised services such as weekend collection, next flight out and extended pick-up and delivery times. Clinical Express enables you to complete your trial as swiftly as possible.

To help you tailor Clinical Express to the needs of your study, we offer you a choice of service level: Express and Exclusive.

Clinical Express

Express and exclusive

Clinical Express staff are highly experienced in clinical trial logistics. They can help you design a trial and recommend the best logistics options for your trial profile. They can even manage the entire trial logistics operation for you, leaving you free to concentrate on your study.

Leading pharmaceutical companies, central laboratories and contract research organisations already trust Clinical Express to complete projects on budget and on time. We focus on logistics, so you can focus on your study.

The benefits of working with Clinical Express:

- dedicated Project Manager to prepare your logistics budgets
- advice on trial design, service options and transit times
- written processes and instructions
- support with Investigator meetings
- single point of contact for Investigators
- full review on study completion
- application of quality processes to achieve continuous improvement

Clinical Express brings the skills, resources and experience of TNT to clinical trial participants. This service already delivers more than 1,000,000 urgent clinical trial consignments every year.

You can also benefit from TNT's Healthcare Centres. Backed by a global communication network and a study management system, they provide help with all aspects of your trial. Whether you need expert advice and support implementing a new trial or proactive customer care during transport.

sure *we can*
